2009	29	8.4	10.4 ¹²
2010	31	9.1	10.5 ¹³

Progress toward achievement of the University's goal to increase the number of African-American faculty, EEO-1 administrators, students and degrees awarded is assessed by review of statistical data during the time period of fall 1998 through fall 2010. Annual progress may be observed by comparing changes from 2007 through 2010. These data are provided in Tables 1 and 2 above.

As indicated in Table 1, in fall 1998, twenty-six (3.7%) of all university faculty were African-American. By 2007 this number increased to thirty (4.1%), and in 2008, it increased to thirty-three (4.3%). The number of African American faculty members remained constant in 2009 and 2010 at thirty-three. As a result of the economic recession and the substantial decline in financial support from the state to the University, the total number of faculty employed at USA declined from 2008 to 2010. Because total faculty size decreased, and the number of African American faculty remained constant, the percentage of the faculty that is African American increased slightly in 2009 and 2010 (4.4%). In 2010, the percentage of African-American faculty in colleges and universities nationally was 5.4%. In 2008 (the most recent data available), the percentage of African American faculty at doctoral granting institutions was 4.3%. The number of African-American faculty at the University of South Alabama is

close to the national average and we are strongly committed to ongoing pursuit of all appropriate ways to increase the presence of African-American faculty on the USA campus.

As indicated in Table 2, by December of 2010, African-Americans comprised 9.1% of all administrators (EEO-1) employed at the University of South Alabama, an increase from 2009 when it was 8.4%. Nationally, 10.5% of college and university administrators are African-American. Efforts will continue at the University to continue this upward trend.

As indicated in Table 3, in fall 1998, 1,439 (12.6%) of the University's total enrollment was African-American as compared to 2,650 (17.9%) in fall 2010. African-American undergraduate enrollment increased from 1,250 (13.4%) in fall 1998 to 2,299 (19.7%) in fall 2010. African-American graduate enrollment increased from 169 (9.2%) in fall 1998 to 332 (11.8%) in fall 2010. As evidenced by these numbers, the University is achieving its goals of increasing African-American enrollment.

In the academic year 1997-1998, the percentage of undergraduate degrees awarded to African-Americans was 124 (7.8%) as compared to 249 (15.7%) in 2009-10. The number (from 210 to 249) and percentage (from 12.7% to 15.7%) of undergraduate degrees awarded to African American students also increased from 2008-9 to 2009-10. At the graduate level, degrees awarded to African-Americans increased from 38 (7.6%) in 1997-8 to 70 (8.5%) in 2009-10. Note, too, that the number of first professional (M.D.) degrees awarded by the University increased from 2 (3.2%) in 2008-9 to 6 (9.1%) in 2009-10. This increase in M.D.'s awarded to African American students reverses the decrease that had occurred in the previous year, 2008-9.

It should be noted, however, that the number of African Americans earning graduate degrees decreased from 2007-8 through 2009-10. This decline can be attributed to changes in the size of graduate programs in the College of Education. Due to changes in state policy, the number of students of all races entering these programs has declined in recent years, and since these programs were popular among African American students, these changes have had negative effects on African American graduate enrollments at USA. Nonetheless, it is clear that over the last eleven years, the University has made substantial progress in increasing the number of African American students earning undergraduate and graduate degrees.

In conclusion, the University has made substantial progress in accomplishing its goal to increase the number of African-American faculty, African-American administrators, and African-American student enrollment and degrees awarded. The University will continue to assess progress while sustaining the commitment to diversity and multiculturalism with an emphasis on African-Americans.
